Durga Sai Sri Ramireddy

Austin, TX | (713) 503-3699 | durga.ramireddy03@gmail.com | LinkedIn | Portfolio | Published Articles

SUMMARY

MS in Cybersecurity graduate with hands-on experience in security operations, SIEM detection engineering, and threat intelligence research across Active Directory lab environments. Skilled in translating attacker techniques into actionable detection logic and documenting real-world detection gaps.

EDUCATION

University of Houston — Houston, TX
MS in Cybersecurity | GPA: 3.90 — May 2026

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science & Technology — Chennai, India
B.Tech in Computer Science and Engineering — May 2024

EXPERIENCE

Cybersecurity Training & CTF Developer (Volunteer), Raíces Cyber Organization — Aug 2026 - Present

- Serving as Head Coach for the West Coast region, leading the Cyber Athlete Program. Developed training curricula and CTF challenges to support hands-on learning for participants entering the cybersecurity field.
- Applied security, networking and attack/detection knowledge to design educational content for nonprofit training programs.

Independent Cybersecurity Researcher — Jan 2026 - Present

- Designed and validated 17 cybersecurity lab environments spanning adversary emulation, SIEM detection engineering, and AI-assisted triage research.
- Identified and documented a reproducible AI hallucination in a Claude API-based SOC triage pipeline; findings published on Medium.
- Produced 3 formal gap analyses mapping undetected attack techniques to MITRE ATT&CK with remediation recommendations.

CYBERSECURITY PROJECTS

Fraud Cluster OSINT Investigation [GitHub] — Aug - Sep 2026

- Traced a suspicious e-commerce domain through WHOIS, IP WHOIS and BGP/ASN attribution to a shared hosting IP running 173 counterfeit storefronts impersonating 20+ unrelated brands, independently verifying findings via manual spot-checks rather than assuming the pattern.
- Reported findings across four channels and conducted post-report verification testing, finding that remediation blocked only the reported domain at the browser level while the underlying server and roughly 170 unreported cluster members remained fully operational.

Custom SOAR Pipeline with AI Triage - Claude API + VirusTotal + AbuseIPDB [GitHub] — Jun - Aug 2026

- Built a Python-based SOAR pipeline enriching 41 Active Directory and honeytoken-triggered alerts via VirusTotal and AbuseIPDB, then routing them through the Claude API and a 3-rule decision engine to auto-close or escalate, extending prior AI-triage work into a full automation and orchestration workflow.
- Found enrichment data measurably shifted the model's confidence and verdict, and that it introduced false uncertainty on honeytoken alerts after picking up an internal synthetic-data field. Resolved via a rule-based bypass so honeytoken alerts escalate unconditionally without relying on AI judgment.

Active Directory Attack & Detection Lab - Splunk SIEM + Microsoft Defender [GitHub] — Mar - Apr 2026

- Executed 5 attack techniques against a 4-node AD lab environment, then wrote and tuned Splunk detection rules from scratch to detect 4 of 5 attack paths via Windows Event Log correlation.
- Confirmed LDAP enumeration as a detection blind spot generating zero alerts across both Splunk SIEM and Microsoft Defender EDR; produced a formal gap analysis with MITRE ATT&CK-mapped detection logic and remediation steps.

TECHNICAL SKILLS

SIEM & EDR: Splunk Enterprise (SPL, HEC, Dashboards), Microsoft Defender for Business, Kibana/ELK Stack

SOC Operations: Alert Triage, IOC Analysis, True/False Positive Classification, Incident Documentation, Log Correlation, Detection Gap Analysis, Anomaly Detection

Network & Systems: Wireshark, Zeek, Suricata, IDS/IPS Tuning, TCP/IP, DNS, HTTP/S, Active Directory, Windows Server 2022, Linux (Ubuntu, Kali), PowerShell, Windows Event Log Analysis

Frameworks & Tools: MITRE ATT&CK, MITRE Caldera C2, GoPhish, Impacket, BloodHound, Nmap, NIST CSF, AWS Cloud Security, Python, Git/GitHub

CERTIFICATIONS

CompTIA Security+ — Feb 2026
AWS Certified Cloud Practitioner — Jan 2026
Mastercard Cybersecurity Virtual Experience (Forage) — Dec 2024
